## WORK EXPERIENCE

### **PrevailHQ, Android developer**

March 2022 - Present

Developed an already created App, which takes care of the employees. Here you can submit your current status, home office days, and more. Here I learned the structure MVI, design with compose, manage push notifications, dynamic app view and Jetpack implementation.

### **ArkusNexus, Android developer**

March 2021 - Present

Here at Arkus, I expand my horizons with new technologies, new structures and new projects. First of all, I worked with an American partnership, Identiv. There I continue the development of an Android App to make WiFi calls through a library called Linphone. The biggest challenge was to create the channel for video calls and to manage call notifications. On the Android development side, I learned about data bindings and the MVVM architecture, also I learned Room and Retrofit.

### **INEGI, Lead Android developer**

February 2017 - March 2021

After Softtek I returned to INEGI, where I got my old projects and started new ones. At this moment my current role is Lead Android Developer where I manage a team, feature approbations, releases dates, code submitting and planning meetings. Most of the time I'm coding with Java.

### **Softtek, Support Android developer**

September 2016 - February 2017

I worked on an IHG (Intercontinental Hotel Group) project in the Android support team. My principal role was Android App support, resolving conflicts with the whole App like design, structure, Java logic, Gradle instructions, images and more. There I learned a lot because all my activities were monitored by Android and iOS experts. I worked with Junit Test, version control (GIT) and refactoring. This was my first international job, I participated in several international meetings.

## EDUCATION

- Engineering in computer systems

2011 - 2013

Technological University of Aguascalientes' North

- Advance Android Applications Development workshop

2020 (40 hours)

- Advance iOS Applications Development workshop

2020 (40 hours)

KMMX

## LANGUAGES

Spanish: Native
